WiFi Setup Instruction

Getting Started

- Ensure that you have the following steps ready.
- Power on the camera and wait 1 minute for the camera to start-up and initialize.
 - Connect the IP camera to the router with the attached Ethernet cable.
 - Turn on the WiFi on your mobile phone and make sure it is the same WiFi which will be linked to the camera.
 - Download the SHIELDeye app from Apple App Store and Google Play Store.
 - Launch the App and register for an account.

Setting up SHIELDeye camera Method 1

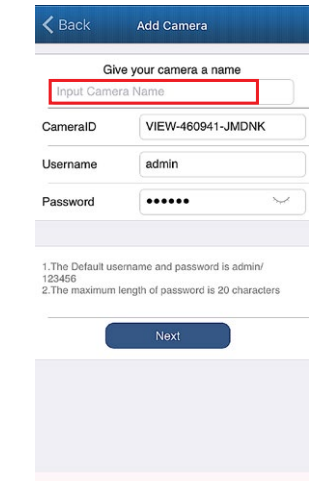

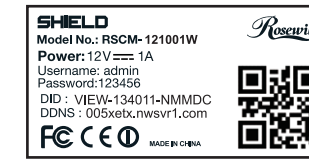

Note:

- The App interface may be little different from the screenshots below.
- Please setup the WiFi in 5 minutes after the camera is power on.

1.Run the SHIELDeye app and tap **Add Camera**.

2.Tap **Add camera via WiFi configuration guide** and scan the QR code at the bottom of the machine. In case the QR code cannot be scanned, please enter the DID# to the CameraID column.

3

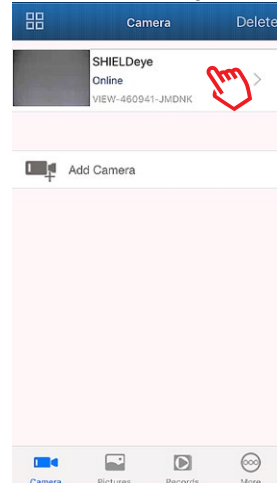

3. Name your camera and tap **Next**.

4.Enter your WiFi SSID and the password and tap **Next**.

4

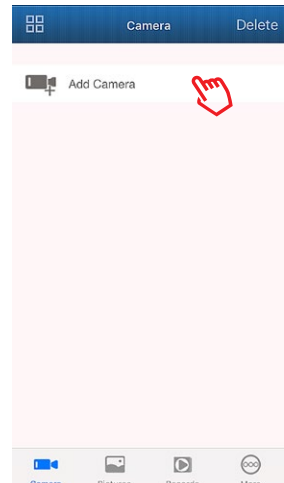

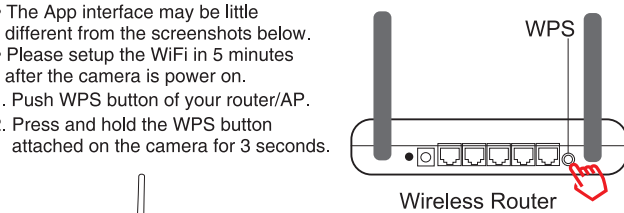

Note: Your IP camera is all set up. You can view the camera by tapping the image. We strongly recommend you to revise the password in User Settings. Tap the ">" at the right of the image to enter Advanced Settings.

Method 2

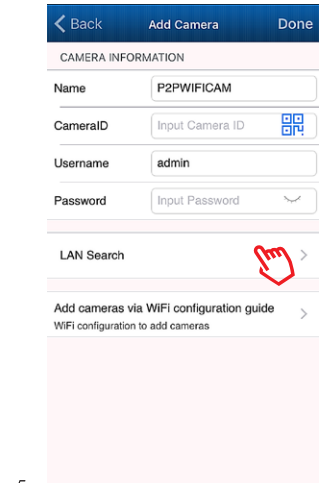

Note:

- The App interface may be little different from the screenshots below.
 - Please setup the WiFi in 5 minutes after the camera is power on.
- Push WPS button of your router/AP.
 - Press and hold the WPS button attached on the camera for 3 seconds.

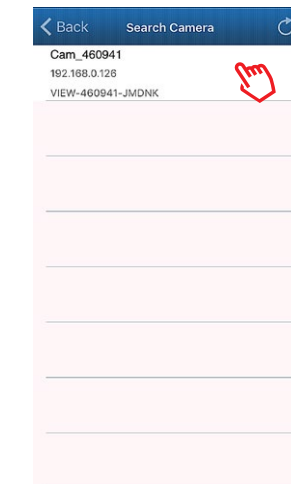

5

- Launch the SHIELDeye app and tap **Add Camera**.
- Tap **LAN Search**. It will search the camera automatically.

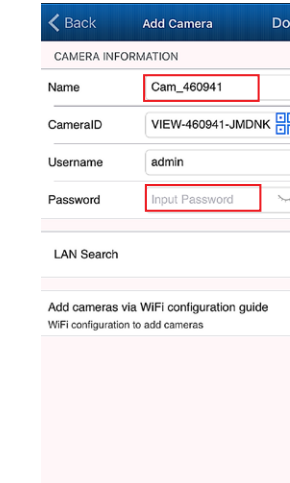

5. Tap the camera searched.

6

- You can rename the camera.
- Enter username (admin) and password (123456) and tap **Done**. Your camera is setup successfully.
