RM-320

Congratulations on your purchase of this Gaming Optical Mouse, your partner in the virtual gaming world. Please carefully read the User's Quick Guide to learn about the installation and the powerful functions of your new Gaming Optical Mouse.

Package Content

Precision Optical Mouse
 Mouse Driver CD-ROM
 User's Quick Guide
 USB to PS/2 Adapter (Option)

Install Hardware

- 1) PS/2 Version: Please turn off the computer. Plug the PS/2 connector of the mouse to the computer.
- 2) USB Version: You may turn on the computer. Plug the USB connector of the mouse to the computer.
- 3) USB to PS/2 Version: Turn off the computer. Plug the adapter of the USB to PS/2 to the mouse USB connector and then connect to the computer.

Install Driver

Note:

- The driver supports Windows 2000/ XP.
- When you change the interface port, please reinstall the driver.

- 1) Insert the driver CD-ROM to your computer. The PC system may automatically install the driver through selecting the PC auto-install function.
- 2) If the PC system does not set the auto-install function, please double click the file "Setup.exe" and follow the setup instructions to complete the driver installation.
- 3) Restart the computer.
- 4) A Mouse Setting icon will appear on the task bar of Windows after you successfully finish the installation.
- 5) Double click the Mouse Setting icon and then follow the instructions of the selection items to set the 4 programmable mouse buttons.

Uninstall Driver

Mouse Software can be removed from Windows by clicking the Add/Remove Programs icon in the Control Panel or clicking the "Uninstall" icon in the folder that "Setup.exe" created in "Programs" of "Start" on Windows desktop. Select Mouse Software installed and click the "Remove" button.

Notification

Optical sensor frame up to 6,000 fps, which means you can really control the gaming mouse in a very short time and quick speed.

Please avoid using the optical mouse on any reflection, transparent or complex-pattern surface.

Trouble Shooting

Question 1: No mouse movement.

Solution:

- 1) Make sure the software that you are using supports a mouse.
- 2) Check that mouse is plugged into serial port at the back of computer.
- 3) Ensure that mouse driver is installed into system.

Question 2: The cursor on the screen remains at one spot or moves erratically.

Solution: Check the mouse cable for any breaks or sharp twists. Examine the cable closely where it connects to the mouse.

Question 3: The cursor movement stops at a corner and no longer responds to the mouse movement.

Solution:

- 1) Run the mouse driver to check which mode the mouse is operating in.
- 2) If the mouse is wireless, please check the battery power or re-link the mouse.

Question 4: Mouse movement does not produce corresponding cursor movement or there is a brief pause during movement.

Solution:

- 1) Check the connector or the cables of the mouse and the receiver if there is any break or tangled.
- 2) If the mouse is wireless, please check the distance between the mouse and the receiver.

Question 5: Displayed error number -115 on screen when install mouse driver software.

Solution: The error usually occurs because a virus-checking program is being used on the System to prevent files from being renamed. Please shutdown any virus checking software running on the system and then run the setup again.

Question 6: Detection problems of the mouse

Solution:

If your mouse is connected to the mouse port and is not detected by the system, attempt the following step(s):

- 1) Please check the mouse port setting from the computer.
- 2) If you have a mouse with a mouse port adapter, please connect the mouse to the computer through the mouse port adapter. Restart the computer and check if the mouse is detected properly.
- 3) If the mouse port adapter is not included in your package, your mouse was designed to work on only one type of ports (PS/2 or USB). Please check the mouse port setting from the computer.
- 4) If the problem persists, please check for a possible computer BIOS ROM upgrade from your computer manufacturer.

- 5) Some notebook systems, such as IBM Thinkpad, have both an external Mouse Port and an integrated Pointing Stick, which is connected to the Mouse Port. If your mouse is having difficulty running on the Mouse Port of this type of system, please other ports.

Question 7: Conflicts with other Devices

Solution: Some softwares, provided by other manufacturers, include mouse functions, which may conflict with the Gaming Mouse. We recommend you to remove the software installed previously and then install the Gaming mouse software.

Question 9: Problems of operating the wheel

Solution:

- 1) Verify that the "Browser Mouse" or "Mouse Control Panel" application is installed properly. If you do not find the "Browser Mouse" or "Mouse Control Panel" icon in the system tray, you need to reinstall mouse software.
- 2) Please install the mouse driver while the OS is under Windows 98.
- 3) Some other applications with mouse scrolling function may conflict with this mouse function. Remove these applications before install the Gaming mouse software.
