

PRODUCT INTRODUCTION

This is a 2.4G and 5G dual band Wi-Fi 6 PCI Express card, designed to improve the speed requirements of users in video games. PCIe x1, x4, x8 or x16 slots for desktop hosts. The motherboard needs to support PCIe v2.1 Gen 2 and USB 2.0 interfaces.

It adopts Intel AX200 chipset, is compatible with IEEE 802.11.b/g/n/ac/ax, supports high-performance dual channel network and full duplex communication, can reach a maximum transmission rate of 2974 Mbps, and supports Bluetooth version 5.0.

The driver supports Windows 10 (64-bit).

INSTALL THE DRIVE

1. Please plug the wireless network card into the PCIe port of the computer.
2. The system will pop up the "Found New Hardware Wizard" dialog box. It is recommended that you choose "Cancel". You can also select "install from list or specified location" and click "Next" to install manually.
3. Insert the included drive disc into the computer drive.
4. Find the driver installer on the CD and double-click "Setup" to install it.
5. The installation program will automatically install the driver and wireless configuration software. Just wait and click "Next".
6. Click "Finish" to complete the driver installation.
7. This product driver only supports 64-bit systems.
