

Wireless N Adapter RNX-N150UBE

Quick Installation Guide

About This Guide

This Quick Installation Guide only provides you some basic configuration instructions. For more detailed information, please refer to the Wireless Network Adapter User Manual.

Before you begin, you must check the following minimum system requirements

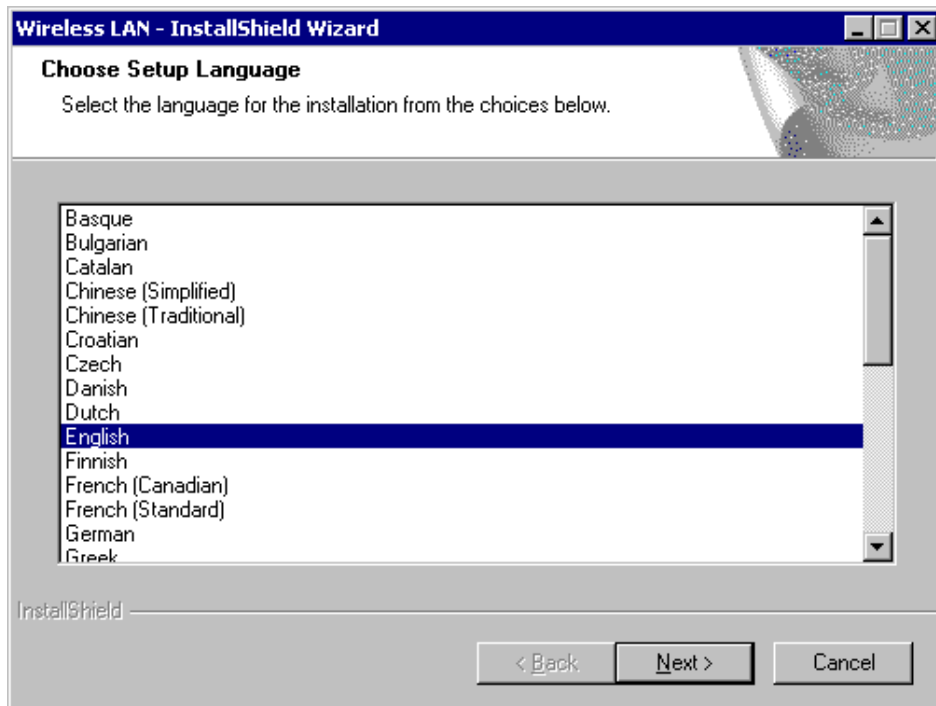

- A notebook /desktop pc with an available USB port
- At least a 300MHz processor and 32MB of memory
- An 802.11n · 802.11g or 802.11b Access Point (for infrastructure Mode) or another 802.11n · 802.11g or 802.11b wireless adapter (for Ad-Hoc; Peer-to-Peer networking mode.)

Install Driver and Utility

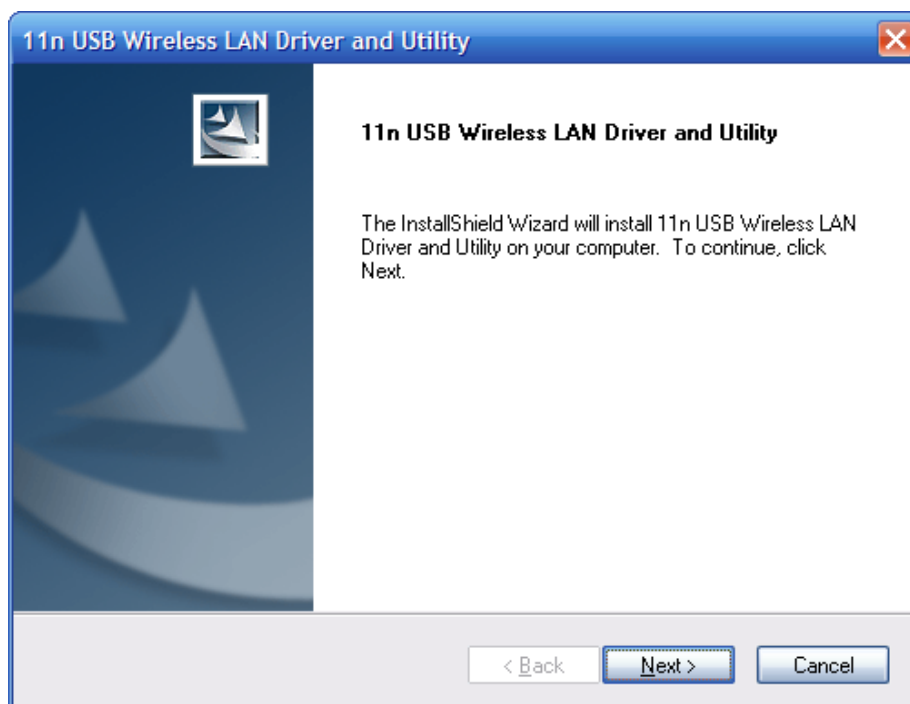

- Insert the Driver and Utility CD-ROM into the CD-ROM driver.
- The Wizard should run automatically, and **Error! Reference source not found.** should appear. If not, click the **Start** button and choose **Run**. In the field that appears, enter D:\autorun.exe (if “D” is the letter of your CD-ROM drive).

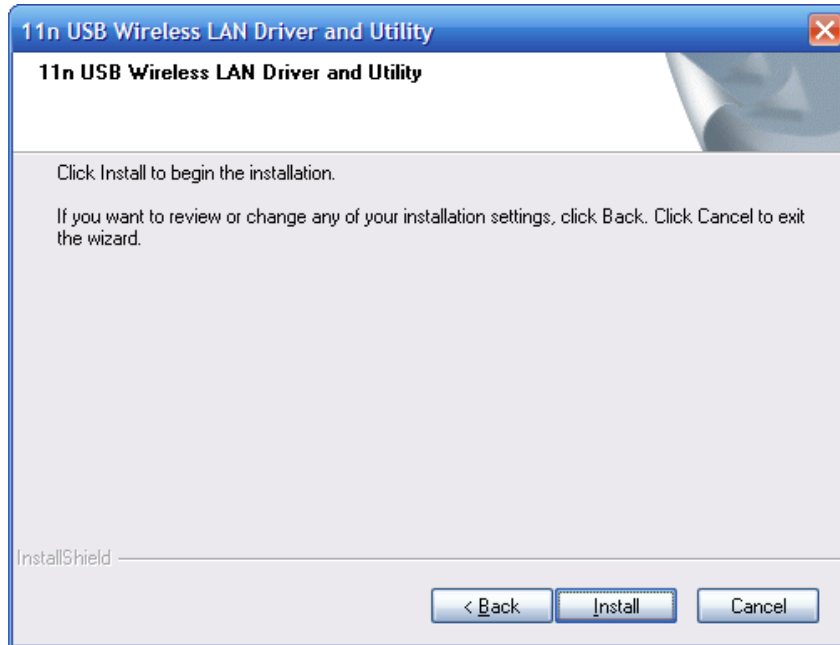

- Click **Install Driver & Utility for USB Wireless Adapter** on the Wireless Client Configuration Utility dialogue box, and then select the installing language from the next screen and click **Next** button.

- Click **Next**

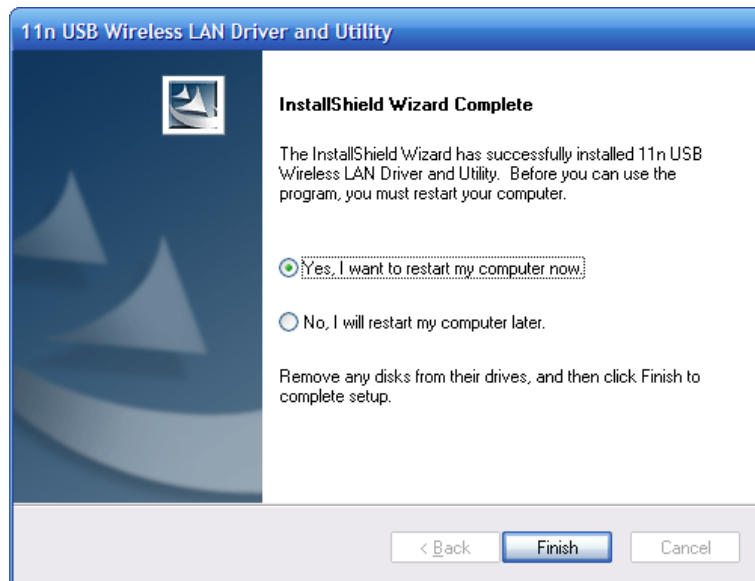

- Click **Install** to start installing

- If you encounter below pop-up windows, please click “**continue Anyway**”.

- Follow the InstallShield Wizard steps, and click **Finish** when done.

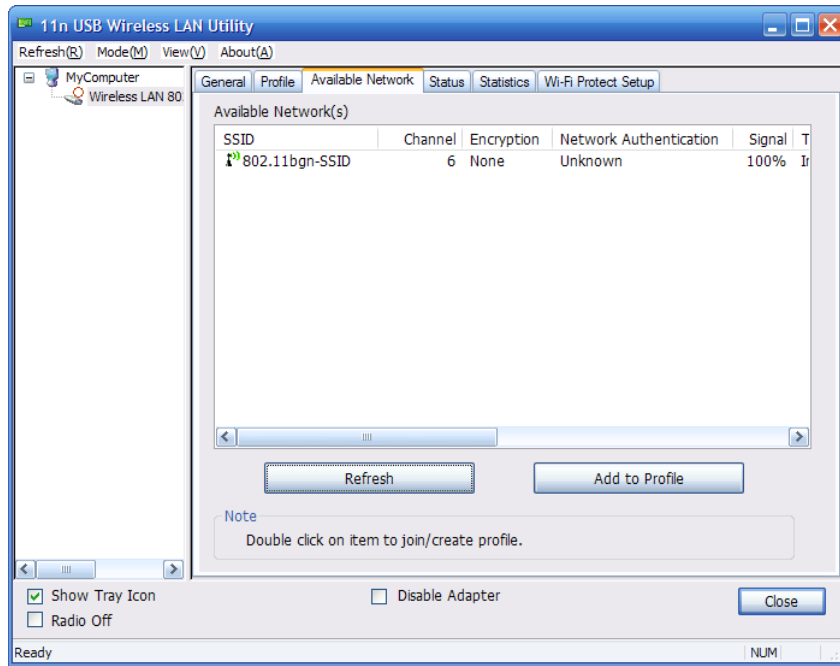

- Click Finish, then your PC or notebook will restart automatically.

Configure your wireless adapter

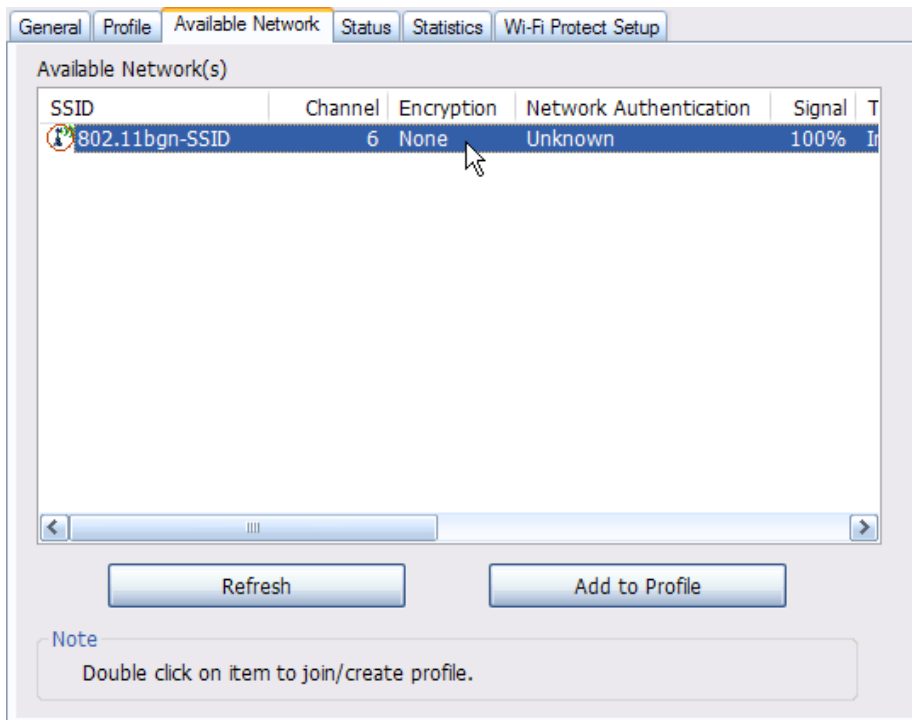

- Double-click the icon on your desktop to run

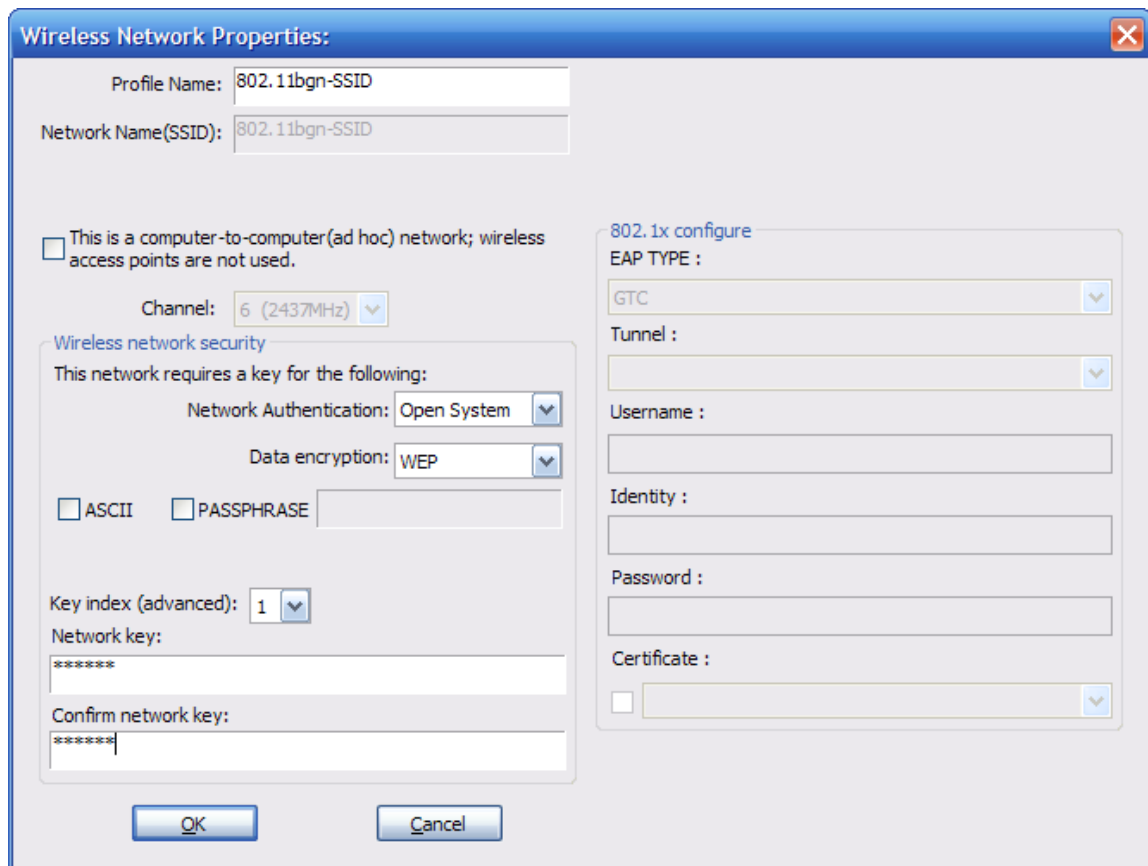

- Select Available Network tab and click **Refresh** button to refresh current available wireless network

- Select the wireless network which you want to connect, and then click “**Add to Profile**”.

- Choose the Network Authentication Mode and Data encryption from the drop-down menu and import the network key in popup window. Then click **OK** button.

Congratulations! You've successfully configured your wireless adapter and connected to a wireless network!
