IV. Enclosure Details

Refer to Figure 2 & 3 for the details of your enclosure.

3.

Warning: Make sure the enclosure is secure and safe so it will not be accidentally bumped. Don't move the dock when it is in use because data and HDD damage can occur.

V. Installing Drivers

Windows OS and Mac OS will automatically detect the setup. After the install/setup, the icon will appear on your system toolbar.

VI. Setting Up

1. Attach USB and power cables (Figure 4).
2. Turn on the enclosure.

4.

VII. Installing an HDD

Refer to section to IV. Enclosure Details and Figure 3 to locate the HDD tray.

1. Unscrew the back of the enclosure and slide out the drive tray (Figure 5).

Figure 5

2. Place the HDD inside and secure against the tray. (Figure 6).

Figure 6

3. Slide the HDD connector into the tray connector. (Figure 6).
Do not bend or damage the I/O pin connections.

5.

4. Screw the HDD to the tray with the screws included in the screw pack (Figure 7).

Figure 7

5. Return the HDD tray inside the enclosure, but do not push it completely shut (Figure 8 & 9).

Figure 8

6.

6. Connect the LED cable to the PCB on the tray (Figure 9).

Figure 9

7. Push the HDD tray completely shut against the enclosure.

8. Screw it shut to safeguard the HDD stays connected and is protected (Figure 10).

VIII. Notes

1. Different OS and different computers take a different amount of time to recognize the enclosure.
2. If you are attaching the newly configured external HDD/SSD to the PC or Mac for the first time, please wait for 1 minute for the system to recognize the hardware.
3. If your HDD or SSD is new, it may have to be formatted. See OS instructions from the manufacturer or publisher.
4. Before turning on the power, please make sure the HDD is properly installed.
5. Do not take out HDD/SSD while it is in on. It could cause damage.
6. Window XP (32) has a max. capacity of a 2 TB HDD. (Please check Windows official website for details.)
7. Please turn off and unplug the enclosure for long term storage.
